

Multimorbidity

Priority Area	
Public Health	
Abstract	
<p>Non-communicable diseases, the leading cause of death worldwide, usually co-exist with other chronic health conditions in the same individual giving rise to multimorbidity. There is lack of data on the burden or clustering of multimorbidity at the population level, or context-specific evidence to guide integrated, optimal prevention and management of multimorbidity in sub-Saharan Africa (SSA). The Multimorbidity CoRE will leverage digital technology and artificial intelligence to address key gaps in quantification, clustering, trend prediction and evaluation of new interventions to improve diagnostics, safety, and effectiveness of interventions for prevention, treatment, and control of multimorbidity in SSA. To ensure sustainability, this CoRE will collaborate with governments, industry, and partner agencies to enhance training of the next generation of health care practitioners across the spectrum of patient care for multimorbidity in all partner countries. The CoRE will explore precision medicine approaches as a next-step strategy towards addressing multimorbidity in SSA.</p>	
Co-Leads (Academic, University)	
ARUA	The Guild
<p>Prof. George Obeng Adjei, Director, Centre for Tropical Clinical Pharmacology and Therapeutics - University of Ghana, Ghana</p> <p>Prof. Tivani Mashamba Thompson, Director of the Centre for Development and Implementation of Point-of-Care Diagnostics - University of Pretoria, South Africa</p>	<p>Prof. Paramjit Gill, Professor of General Practice - University of Warwick, United Kingdom</p>
Core Partners (Academic, University)	
<p>Dr. Cari Van Schalkwyk, Senior Researcher, South African Centre for Epidemiological Modelling and Analysis - Stellenbosch University, South Africa</p>	
<p>Prof. Per Kallestrup, Professor, Department of Public Health Institute of General Medical Practice - Aarhus University, Denmark</p>	
<p>Prof. Bernice T. Dahn, Vice President/Executive Dean, College of Health Sciences - University of Liberia, Liberia</p>	
<p>Prof. Melanie Amna Abas, Professor of Global Mental Health Institute of Psychiatry, Psychology and Neuroscience - King's College London, United Kingdom</p>	
<p>Prof. Christian Gluud, Head, CTU - Centre for Clinical Intervention Research - Copenhagen University Hospital – Rigshospitalet, Denmark</p>	
Other Partners (including non-academic ones)	
<p>Dr Marion Subah, Country Representative - Last Mile Health, Liberia</p>	
<p>Dr. Aba Ankomaba Folson, Department of Medicine - University of Health and Allied Sciences, Ghana</p>	
<p>Dr. Mame Yaa Nyarko, Medical Superintendent - Princess Marie-Louise Childrens' Hospital, Ghana</p>
