

Migration and Health

Priority Area	
Public Health	
Abstract	
<p>Migration – involving diverse movements of people within and between countries and regions, including refugees – is a key determinant of health but evidence-informed policy and programme responses to address migration and health (MH) remain limited. In line with The Guild Position paper on health research (2022) and the AU-EU Innovation Agenda, Health and Migration CoRE addresses the key scientific challenge of MH across the AU-EU migration corridor. This corridor is associated with multiple health concerns determined by a range of structural and social factors that are experienced differently by diverse migrant groups and the communities through which they move, live and work. The Health and Migration CoRE will develop collaborative research to generate evidence-informed, cross-country policy approaches to support good health. The focus will be on migrants and migration-impacted communities along the AU-EU migration corridor, as well as efforts towards Universal Health Coverage.</p>	
Co-Leads (Academic, University)	
ARUA	The Guild
Associate Professor Jo Vearey, Director of the ARUA CoE on Migration & Mobility and the ACMS; Dr Carren Ginsburg, Senior Researcher MRC/Wits Agincourt Unit - University of Witwatersrand , South Africa	Dr Soorej Jose Puthoopparambil, Director of the WHO Collaborating Centre (WHO CC) on Migration and Health Data and Evidence, Global health Migration Unit - Uppsala University , Sweden
